From Uzbekistan to Central Asia and the Belt and Road Initiative

Thomas Chan,
One Belt One Road Research Institute,
Chu Hai College, Hong Kong
January 2018
The historical silk Road(s) with many branching routes, but the centre of Eurasian connectivity had always been in the Central Asia and in particular in Uzbekistan.

Central Asia as the hub of the ancient Silk Road was not restricted to over land routes, east and west, but also extended north to south; it could go down cross the present day Afghanistan, Iran and Pakistan to reach the Persian Gulf and Arabian Sea that would lead to other areas of the Indian Ocean. The hub functions only diminished in the past centuries because of the Great Power Game between Russia and Britain.
The end of the Cold War provides chances for relinking: CAREC plans for the Eurasian connections in the 1990s

11 CAREC Countries: Afghanistan, Azerbaijan, China, Georgia, Kazakhstan, Kyrgyzstan, Mongolia, Pakistan, Tajikistan, Turkmenistan, & Uzbekistan (established by ADB in 1997)
About $24.2 billion invested in transport, trade facilitation, and energy projects; From 6 projects in 2001 to 154 projects in 2014.
TRACECA - financed by the European Union and aimed at the development of the transport corridor from Europe, crossing the Black Sea, Caucasus, the Caspian Sea and reaching the Central Asian countries (first initiated in 1993 with 13 members since 2009).

EU and Armenia
Azerbaijan
Bulgaria
Georgia
Iran
Kazakhstan
Kyrgyzstan
Moldova
Romania
Tajikistan
Turkey
Ukraine
Uzbekistan

The support of China’s Belt and Road Initiative to Central Asian development – regular freight trains linking with Europe & Central Asia

Central Asia serves as the regional hub for China Europe trade:

- The northern route through Russia and Kazakhstan;
- The southern route through Uzbekistan with extensions to Turkey, Persian Gulf & Arabian Sea.
A game changer for China’s link with the Middle East (oil supply) – to avoid the Indian Ocean altogether

The improved Gwadar port has started operation in 2017 with also cargoes carried from Kashgar through the Kara Kunlun Highway for seaborne transport via the port.

From the heart of Eurasia of Uzbekistan and Central Asia, the silk road routes spread in all directions.
Leveraging on the local Global financial and advanced producer service centre functions and its special relationship with other parts of China, Hong Kong could serve as the overseas headquarter for Uzbekistan and Central Asia countries and become the platform for investors and firms as well as other economic and social organizations from all countries to exchange, cooperate and collaborate. Diversity brings innovation and synergy would mean coevolution and mutual benefits. Modern telecommunication technological advancement has eliminated the limitations imposed by geography and weakened any space-related institutional and cultural obstacles.

Hong Kong needs to improve connectivity with Uzbekistan and Central Asia by means of bilateral investment agreements, free trade agreements, visa exemption agreements and other economic and cultural cooperation as well as direct flights. Hong Kong should have more education exchanges with them.
